PROFILE

An Information Technology graduate with a strong passion for developing modern technological solutions. I possess hands-on experience in mobile application and systems development, along with a solid understanding of networking and databases. I have worked on several diverse projects that combine practical software design with user experience enhancement. I aspire to join a professional technical environment where I can leverage my programming and analytical skills to develop innovative solutions that contribute to improving operational efficiency and enhancing digital services.

PROJECTS

Siin – Multi-Vendor E-Commerce Platform

Flutter, Laravel, REST APIs

Online Examination System

C#, ASP.NET Web API, HTML5

- Developed RESTful APIs for online exam management.
- Integrated backend with responsive web interface.
- Implemented scoring and student data handling logic.

AI Chatbot System

Python, FastAPI

- Built backend APIs for chatbot interaction.
- Integrated chatbot with web interface.
- Managed request handling and response processing.

Library Management System

Python, Tkinter

- Add, edit, and delete book records
- Search functionality
- Basic reporting features
- User-friendly GUI using Tkinter

CERTIFICATES

Python Programming Certificate

Azal Training & Development Center – 2022

Cyber Security Certificate

Azal Training & Development Center – 2022

LANGUAGES

Arabic ●●●●●

English ●●●●●

EDUCATION

Bachelor's Degree

Azal University for Human Development

2022 – 2026 | Sana'a, Yemen

Graduation Project – “siin” Application:

Developed a multi-vendor e-commerce mobile application named “Siin”, designed to provide construction materials, electrical supplies, furniture, and related products. The platform also includes a dedicated services section that connects users with contractors, carpenters, designers, and other service providers.

The application supports two purchasing models: Ordering directly from specific stores (multi-vendor system).

Ordering products without selecting a particular store.

Additionally, a comprehensive admin dashboard was developed to manage products, vendors, service providers, orders, and overall system operations, ensuring full control and efficient platform management.

SKILLS

Mobile Application

Flutter, State Management, UI/UX Implementation.

Web Development

Laravel, HTML5, CSS.

Database Management

MySQL, CRUD Operations.

Networking

Network setup, IP configuration.

Version Control

Git, GitHub

Desktop Application

C# Windows Forms, Python Tkinter.

Backend Development

RESTful API Design with Laravel.

System Analysis

Requirement gathering, ERD design, and documentation

Data Analysis

Python.

Soft Skills

Analytical Thinking & Problem Solving, Teamwork

Windows Server

Active Directory basics, User & Group Management, DNS & DHCP configuration, network configuration
